The Massive Expressionist

MEGA TILE

MAXIMUS™
THE GREATEST PORCELAIN TILES

THE SURFACE THAT INSPIRES

MEGA TILE

Introducing the new marble collection. Our signature creation available in new sizes and new designs for your modern and urban spaces of today. We understand the modern lifestyle aspirations that you desire and that's why we have designed the new marble collection in three different variants, the white body, full body and the color body version. With the new marble collection, every aspect of your design and lifestyle needs can be addressed and customized. But there is one aspect which makes marble stand out from all the other tiles in the market. It comes in larger sizes and with lesser cuts which gives you ample space to innovate and create. With a wide array of choices available starting from cementa and stone to beige and classic, marble collection has a design ready for your every space.

BIG SLAB TILE

“SPECIAL LARGE TILES OFFER
ENDLESS DECORATION IMAGINATION.”

Today's digital age undeniably makes us feel that the world is wider than before, and that is why the new generation does not need to be attached to original sizes. This year, oversized tiles are the ones to watch with a size as large as 160x320 cm., luxurious modern marble pattern, and the tangible prices. Furthermore, our tiles are renowned for being stronger than natural rock, low maintenance and fast installation.

INSTALLATION GUIDE

PREPARING THE WORKSITE

Find a place to work with enough room to move the tiles freely

Make sure that you have a completely flat surface to work on

If the floor is not level, apply a self-levelling mortar

Mark out the area where the tiles are to be laid to save on cement adhesive

HANDLING THE TILES

Position the supporting frame so that is centered on the tile

Do not rest the tile but the frame against surfaces

BONDING THE TILES

Butter the underside of the tile, using a 3 mm trowel

Make sure that the coat of adhesive is always the same thickness

Always work perpendicular to the long side of the tile

Apply a coat of adhesive to the floor, using a 10-12 mm trowel

Cover the approximate area where the tile will go

Always work perpendicular to the long side of the tile

...so that any air below it is released

LAYING THE TILES

Position the tile carefully and remove the suction pads

Tap it to remove any air bubbles in the cement adhesive

Remove any surplus adhesive

Grout the tile joints with a suitable grouting material of a similar colour to the tiles

Moisten the surface well with water to remove any surplus
